# Zafiro Pot Collection

Our new Zafiro and Zaia pottery collections integrate bold, beautiful colors with a high quality stoneware clay usually reserved for kitchen bakeware. The clay is formed by high pressure hydraulic press and fired at over 2,000 degrees. The result is a pot that is extremely durable and suitable for both indoor and outdoor use.

# Glazed Standards

Our glazed standard pots are made using the highest quality terracotta clay. Pressing the pots and firing them at 2,000 degrees results in a very dense and smooth pot. Colorful glazes are applied and the pots are fired a second time. The end result is a very high quality pot that is both colorful and durable.
